Michigan Grown GLADIOLUS BULBS

For Outside Planting—Counter Sales or Mail Order Trade

In buying direct from the grower, you have the assurance of quality bulbs grown especially for the wholesale trade from young, vigorous stock. You are assured of high-crowned true-to-name bulbs, accurately graded, hand selected; clean and healthy—thrips free. These bulbs cannot fail to produce top grade flowers.

For best results plant after January 15th. For cold frame planting use EITHER first or second size bulbs. Many successful florists use third size bulbs for main crop outside, with second size for extra early or late.

If not familiar with the varieties listed, we recommend our Collections A, B, C or D, which we feature as an introductory offer to new customers.

If bulbs are ordered for counter trade, colored illustrations, planting instructions and newspaper mats will be furnished upon request.

Delivery can be made any time from Dec. 1st to May 15th; and you may be assured that every effort will be made to handle your order efficiently, promptly and to your entire satisfaction. Prices are subject to change. If in need of large quantities, send us your list for a special quotation.

Dust with DDT for protection against insects. To prevent thrips infestation, we recommend dusting with 5% DDT once a week, starting when the plants are 6 inches high, until the flower spikes appear. The best time to apply this dust is early morning while leaves are wet with dew. Wettable DDT sprays may be used. Follow manufacturers recommendations.
